Educational Objectives and Target Audience

This program will focus on the medical aspects of child physical abuse, sexual abuse and neglect. It will provide an understanding of the mechanisms by which injuries are inflicted and the scientific basis for medical determinations as to whether abuse has or has not occurred. Those who would benefit from participation in the program include:

- Physicians
- Nurses
- Social Workers
- Law Enforcement Personnel
- Attorneys
- Guardians ad Litem

The roles of all members of the investigative team in gathering and sharing information to arrive at appropriate conclusions will be stressed.

Please note: Some of the material presented will be graphic. Such content is necessary to present all the information relevant to a full understanding of the medical aspects of child abuse and neglect.
