Welcome

The College of Medicine – Jacksonville Faculty Council was formed for the purpose of promoting the advancement of medicine by elevating and sustaining education; fostering patient care of the highest quality; supporting medical discovery as well as basic science research; promoting mutual fellowship and good feeling among the faculty; providing an effective means of communicating between the faculty and administration of the College of Medicine and Health Science Center; cooperating with the other administrative units within the Health Science Center and University in all matters of mutual interest; and by directing the energies of the members in the interest of public health and welfare.

This organization seeks to insure maximum communication through defined orderly procedures, to clarify the means by which faculty can effectively contribute to and identify with the affairs of the college, to allow the voting faculty to be responsible for developing the educational policies of the College and, in the spirit of shared governance, to advise the Dean of the College of Medicine for Jacksonville and Administration on all matters pertaining to faculty responsibilities.
