About the CTSI

The UF CTSI works on many fronts to improve research and health. It provides resources for research teams, career development programs, pilot project funding and an extensive network of local, state and national partners.

CTSI Web Portal

Visit the CTSI's website for information about additional programs and research services: www.ctsi.ufl.edu.

CTSI Listserv

Subscribe to the CTSI listserv by emailing Claire Baralt at cbaralt@ufl.edu.

The UF CTSI is supported by NIH Clinical and Translational Science Awards UL1 TR000064, KL2 TR000065 and TL1 TR000066, and by significant matching commitments from UF's Office of Research and College of Medicine.

Established in 2011 through the UF Clinical and Translational Science Institute's Community Engagement and Research Program, the North Florida Pediatric Community Research Network includes 16 pediatric and adolescent primary care clinics with more than 60 physicians and health care providers throughout Jacksonville and the surrounding counties (see reverse for map of network sites). It is registered with the Agency for Healthcare Research and Quality as a Practice-Based Research Network.

Mission

To encourage and facilitate practice-based research in primary care settings with a specific emphasis on pediatric and adolescent health

Vision

To facilitate connections between UF's academic researchers and community-based clinicians to create mutually beneficial research partnerships

Goal

To accelerate the development of practice-based evidence that supports better health care outcomes in our diverse communities

Network Characteristics and Composition

16 clinics with more than 60 physicians and health care providers, including:

- Academic-affiliated practices
- Hospital-affiliated practices
- Health Department health centers (including Federally Qualified Health Centers)
- Private practices

Benefits of PBRN Membership

- Involvement in practical, relevant and important research
- Collaboration, networking and mentoring opportunities
- Affiliation with a diverse group of healthcare professionals
- Regional and national study recognition
- Incentives for study participation (not every study will provide incentives)
- Improve quality of care and patient/ parent satisfaction
- Invaluable research experience
- Enhanced communication skills among the site's care team
- Continuing education opportunities for physicians, providers and staff

Studies Underway

- Health IMPACTS for Florida pilot studies (health risk assessments and concussion management for youth)
- Coming soon: CTSA Sentinel Network study
